Teachers: Grades 3-4 - Select six story cubes from your collection. Have the student roll the cubes. Then have them draw the pictures in the boxes. As they draw, tell them to think of a story using the images. Then write the story on the My Story page. Grades 5-6 - Select six story cubes from your collection. Have the students draw the images in the small boxes. As they draw, tell them to think of a story using the images. Allow the students some time to come up with a title, the setting, character names, time/era, genre, geography of the story, etc. Encourage them to be the best author and illustrator they can be. Before they write their story, encourage them to complete the storyboard on the back. *For the teacher, a grading rubric is provided on the bottom of the fourth page.*
