

How to make a giant tic tac toe game

1. Find a large piece of wood, square in shape.
 - a. You could use particle board, but it might be splintery.
2. Paint the traditional tic tac toe grid onto the wood or board. You could even use a wood burning tool to create the grid (this will last longer and will not have to be repainted)
3. Gather 10 large rocks (about palm-sized) that are smooth and flat in shape
4. Paint 5 of the stone as ladybugs or other fun insect
5. Paint the other five as another insect
6. Allow to dry
 - a. Optional: Seal with clear epoxy to prevent wear, especially if you will be playing a lot

Have fun!
